Objectives and Philosophy: The objective of the course is to understand the basic principles of calculus, including both derivatives and integrals. There will be an emphasis on problems, examples, and computations.

The secrets to success in this course are:

- Do your homework.
- Come to class and pay attention.
- Read the textbook.

Class Meetings: The class meets 8:30–9:25am in State Hall 219 on Monday, Tuesday, Wednesday, and Friday, except for official university holidays. There will be no class on Monday January 17. There will also be no class from Monday March 14 through Friday March 18.

The final examination is scheduled for Thursday April 28, 1:20–3:50pm.

Prerequisites: In order to take this class, you must have:

- passed MAT 1800 with a grade of C- or better in Winter 2010, Spring/Summer 2010, or Fall 2010; or
- earned an acceptable score on a Wayne State mathematics placement exam taken after January 10, 2010; or
- earned a validated score of 29 or better on the ACT Math.

Students should have a command of algebra, geometry, trigonometry, and elementary functions corresponding approximately to four years of college-preparatory mathematics.

The official Department of Mathematics webpage about mathematics placement is http://www.clas.wayne.edu/unit-inner.asp?WebPageID=1422

Text: The required text is James Stewart: Calculus: Early Transcendentals, 6e. We will cover most of Chapters 1 through 5. The same text is used in MAT 2020 and MAT 2030.

E-mail: isaksen@math.wayne.edu.

Office Hours: FAB 1195, Mondays and Wednesdays 9:35–10:30am.

Online information: All information for this course, including the content of this sheet, will be posted at http://www.math.wayne.edu/~isaksen/Teaching/Courses/11W-2010

Calculators: You will need a graphing calculator, although this course will not rely heavily on calculators. Suggested models include the TI-83, TI-84, and TI-86. More powerful calculators, such as the TI-89, TI-92, and TI-Nspire, are not allowed on exams.

If your calculator is not listed here, please ask me about it.

Examinations: There will be six in-class midterm exams. There won’t be any late or early exams, for any reason. Exam problems will be based on (but not necessarily identical to) assigned homework, examples done in class, and examples worked out in the textbook. All midterm exams will be cumulative.

The exam dates are:
The final exam date is Thursday April 28, 1:20-3:50pm.

**Grading:** Each midterm examination is worth 80 points. The lowest midterm score will be dropped. Taken together, these exams are worth 400 points.

The final examination is worth 200 points. In order to earn at least a C-, your final exam score must be at least 100.

The grading scale, out of 600 points, is:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A/A-</td>
<td>540–600</td>
</tr>
<tr>
<td>B+/B/B-</td>
<td>480–539</td>
</tr>
<tr>
<td>C+/C/C-</td>
<td>420–479</td>
</tr>
<tr>
<td>D+/D/D-</td>
<td>360–419</td>
</tr>
<tr>
<td>F</td>
<td>0–359</td>
</tr>
</tbody>
</table>

**Attendance:** Attendance will be taken at each class meeting. At my discretion, I may add as much as 2% to a student’s grade for good attendance. As a general rule, I consider good attendance to be 7 absences or less.

**Homework:** Homework problems are assigned at each lecture. Students are expected to complete each assignment before the next class meeting. Homeworks will not be collected or graded. We will regularly discuss homework problems in class.

Collaboration in small groups is permitted and encouraged. However, it is important to practice doing problems by yourself because this is the way that you will be tested.

**Extra Help:** The Mathematics Resource Center, located in FAB 1198, provides free high-quality tutoring by mathematics majors who are experts in the course material for MAT 2010. The MRC is a great place to do your homework.

**Student Disability Services:** If you have a documented disability that requires accommodations, you will need to register with Student Disability Services. I will be happy to discuss this further with you in private.
