Wayne State University would like to have student opinions about parking conditions on campus. Not all of the students can be interviewed because there are too many.

1. Describe in detail a practical method for choosing a sample of 100 students that uses voluntary response. Explain how this sample is likely to be different than the overall student population.

2. Describe in detail a practical method for choosing a sample of 100 students that uses a convenience sample. Explain how the students in this sample are likely to be different than the overall student population.
3. Describe in detail a practical method for choosing a simple random sample of 100 students.
