

**MIDWEST TOPOLOGY SEMINAR**  
(second announcement)  
April 18, 1998

1:30 Coffee

10:00 Matt Ando, University of Virginia  
*Isogenies of formal groups, the  $E_n$  Dyer-Lashof algebra, and the  $E_n$  homology of BU*

11:30 Stephen Theriault, MIT  
*A Reconstruction of Anick's Fibration*

2:30 Chengbo Yue, University of Illinois at Chicago  
*Invariant conformal structure on the ideal boundary of negatively curved 3-manifolds*

4:00 Ran Levi, Northwestern University  
*On combinatorial models for iterated loop spaces and some possible applications*

6:00 Party

For directions to UIC use the EAST SIDE directions from the following site:
